Commentary: In year 6 pupils are required to use their knowledge of the order of operations to carry out calculations involving the four operations, i.e. BODMAS. In this question, it is necessary to evaluate 15×5 before subtracting from 120. This requires pupils to apply a learned procedure to a problem with a small number of steps where there is a simple response.

Content domain: 6C9 - Use their knowledge of the order of operations to carry out calculations involving the four operations.

5	Award TWO marks for the correct answer of 59. If the answer is incorrect, award ONE mark for the formal method of long division, eg: $ \begin{array}{r} \text{Wrong answer} \\ 28 \overline{) 1652} \\ \underline{- 140} \\ 252 \\ \underline{- 252} \\ 0 \end{array} $	Up to 2 marks	Working must be carried through to reach an answer for the award of ONE mark. In all cases accept follow-through of ONE error in working. Do not award any marks if the final answer is missing.

Commentary: This question illustrates the increased demand of dividing a 4-digit number by a 2-digit
